
CrashKit — glove box card

For when the phone is dead, broken, or you just can't think. Print it, fill it in, keep it in the car.

1. Is anyone hurt? Call 911. You are not in trouble for calling 911 or for calling your family.

THEN, IN ORDER

1. Get out of the traffic lane. Move the car if it still drives. **Do not stand in the road.**
2. Hazard lights on, engine off.
3. Don't say "I'm sorry" and don't say it was your fault — even to be nice.
4. Swap information: name, address, phone, driver's licence, plate, insurance company and policy number.
5. Photograph, from somewhere safe: both cars, both plates, their insurance card, the damage, the road.
6. Get names and phone numbers of anyone who saw it — they leave fast.
7. If police come: which department, officer name, report number. If they don't come, file the report yourself.
8. If the car is towed: write down the company and where it's going.
9. See a doctor the same day if anything hurts, even a little. Tell your own insurer.
